

LEARNING OUTCOMES

TEACHING METHODS

ASSESSMENT METHODS

YEAR 1

Introduction to CPT	Pharmacodynamics	Pharmacokinetics	Individual variability	Drug development & regulation	Medicines management	Evidence-based prescribing	Legal & ethical aspects
Prescription writing	Rational prescribing	Obtaining information	Communication				
Balanced approach to new drugs							

Lectures & seminars	E-learning	Journal clubs	Self-study
Case-based discussion in small working group	Prescribing simulation	E-learning	Student-run clinic

Written & computer-based assessment	Oral examination	Portfolio
-------------------------------------	------------------	-----------

YEAR 2

Rational prescribing	Interactions & contraindications	Commonly used & high risk drugs	Prescribing for special groups	Clinical toxicology	Adverse drug reactions	Misuse of drugs
Prescription writing	Rational prescribing	Non-drug therapy	Obtaining information	Communication		
Risk-benefit analysis	Balanced approach to new drugs					

Lectures & seminars	E-learning	Journal clubs	Self-study
Case-based discussion in small working group	Prescribing simulation	E-learning	Student-run clinic

Written & computer-based assessment	OSCE	Portfolio
-------------------------------------	------	-----------

YEAR 3

Rational prescribing	Interactions & contraindications	Commonly used & high risk drugs	Prescribing for special groups	Antibiotic prescribing & resistance	Complementary medicine
Prescription writing	Rational prescribing	Non-drug therapy	Obtaining information	Communication	Drug calculation
Risk-benefit analysis	Balanced approach to new drugs				

Lectures & seminars	E-learning	Journal clubs	Self-study
Case-based discussion in small working group	Role playing session	E-learning	Student-run clinic

Written & computer-based assessment	OSCE	Portfolio
-------------------------------------	------	-----------

YEAR 4

Prescribing for special groups	Drug adherence & compliance	Therapeutic drug monitoring					
Prescription writing	Rational prescribing	Non-drug therapy	Drug history taking	Communication	Obtaining information	Monitoring medication	Medication review
Balanced approach to new drugs	Risk-benefit analysis	Recognizing personal limitations					

Prescribing tutorials	Bedside teaching	E-learning	Self-study
Real-world prescribing under supervision	Bedside teaching	E-learning	Pre-prescribing seminar

Oral examination	Workplace-based assessment	Portfolio
------------------	----------------------------	-----------

YEAR 5/6

Medication errors	Therapeutic drug monitoring							
Prescription writing	Rational prescribing	Non-drug therapy	Drug history taking	Communication	Obtaining information	Monitoring medication	Clinical toxicology	Adverse drug reactions
Balanced approach to new drugs	Risk-benefit analysis	Recognizing personal limitations						

Prescribing tutorials	Bedside teaching	E-learning	Self-study
Real-world prescribing under supervision	Pre-prescribing seminar	Prescribing tutorial	Student-run clinic

Computer-based assessment	Workplace-based assessment	Portfolio
---------------------------	----------------------------	-----------
